

MOOD:HUDDLE ROOMS

HUDDLE UP

All the rage about Huddle Rooms is not without merit. Here are a few of the many ways small meeting spaces can benefit long-term growth.

FLEXIBLE SPACE

The flexibility of Huddle Spaces is most attractive. These are spaces where everyone feels comfortable - from IT to Sales to Executives, these rooms are built to shift quickly and get work done.

10:00 am Brainstorming Session
2:00 pm Project Prioritization Meeting
4:00 pm Sales Presentation

EASY TO USE

No need for the IT team to start these meetings - set it and forget it.

Gone are the days where James from IT needs to pre-set the room to make a video call. It's so easy to start a video call, even Janet from Accounting can do it. This ease of use ensures everyone has access to helpful technology.

REMOTE INCLUSION

Many remote employees feel left out, Huddle Rooms bring them back into the conversation.

With high-quality audio and video collaboration, remote teams can work efficiently with teams in office. These spaces drive productivity by enabling rapidly productive communication.

INEXPENSIVE

Just getting started in video conferencing? This is the perfect fit.

While large conference rooms are essential to many business, Huddle Rooms make a great compliment for smaller work-groups by creating a cost-effective way to make video conferencing widely available throughout the building.

SMALL SPACES BIG BENEFITS
